

take a look at the future of asset management

digital solutions to sustain performance & flow

Oil Plus brings you a range of innovative digital solutions. Our deep domain knowledge of operation and constraints at the front line of oil & gas has allowed us to deliver efficiencies through the advances in technology to maximise performance, flow, reliability & resilience with ease, without breaking your budget.

Behind our intuitive interface lies our proprietary modular source code which allows us the flexibility to meet the exact needs of our clients. Our solutions are applicable to installations of all ages, they integrate with established systems like PI, SAP & Maximo and can be easily implemented in parallel with existing systems and processes.

Benefits

Our digital workflows and mobile apps help asset teams to simplify, standardise and digitise; to improve both efficiency and quality of risk so they can be consistently effective in the use of their valuable, but often limited, resources.

Enkelt are a member of the prestigious IBM Eco System Partnership and with their support we have integrated our solutions with Maximo and SAP, so we can expand upon the ERP value and enhance business intelligence with our intuitive web and specialist mobile applications.

New Dimension to Risk & Resilience

Leading London energy underwriters have joined IBM in the recognition of our unique and fresh approach to reduce business interruptions and improve the quality of risk and resilience throughout the life of oil & gas assets.

As industry leaders, they value our simple, proactive methodology that provides insight and oversight to prioritise, influence operations, investment and strategy decisions. With our disciplined process to identify and analyse

vulnerabilities, and the financial impact of each decision, we give management a robust governance model and the insight to direct focus, mitigation and corrective actions in the most cost-effective and profitable manner.

Managing Backlog & Investments

This approach has proven to manage backlog, drive operational improvement, reduce losses, guide budget decisions and create asset and team resilience. It is also the most effective way to assure compliance to the ISO 55000 standard.

Easy to Implement & Use

We provide a simple and cost-effective entry point to digitisation. With our deep oil & gas domain knowledge we build simple and intuitive user interfaces, delivering customers pragmatic and low-cost integrated digitised workflows.

Using IBM Bluemix Cloud solutions and offline mobile apps, we provide a system with minimal investment and disruption, eliminating the need for expensive hardware and the creation of expansive Wi-Fi networks.

Solutions

IntegrityPRO is our integrated asset performance & enterprise risk management solution. Designed to consistently improve reliability and reduce the potential for risks to materialise, escalate and recur. It allows management to prioritise focus and investment to mitigate the source of the greatest potential losses. Making it easier to sustain operations and extend asset life with our pragmatic approach to;

- Reduce downtime, losses, costs & risks
- Improve safety, performance, integrity, reliability & resilience

Planned Maintenance Shutdown & Project Management Solution integrates Maximo & SAP into a digital workflow to manage worklists, material & action trackers, project risks, flange break, leak test, scaffold & rigging with our mobile apps to save time and reduce potential for error during this critical period.

Mobile Maximo & SAP greatly reduces the administrative burden for those in the field, allowing them to view & edit work orders & inspections, pdf's & docs while adding images & notations. Our applications work offline on ATEX rated mobile devices to provide more valuable time wherever our client needs it.
